

IntelliShift

You will need to create a new Admin user with Full Telematics permissions, Connect API enabled, and AI Dash Cam enabled.

How to set up an Admin User for API access:

1. Login to your IntelliShift account
2. Click Administration in the left side bar

3. Click Add User in the top right corner of the table

4. Click Start from Scratch

A dialog box titled 'Create New User'. Below the title, it says 'Please choose what method you like to use to create the user.' There are two radio button options: 'Start from scratch' (which is selected) and 'Existing User'. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Create'.

5. Fill in:

a. **Email:** activations+shortname@speedgauge.net

[Be sure to add a plus sign and your companies short name before the @]

b. **First Name:** SpeedGauge

c. **Last Name:** Integration

d. **User Type:** Administrator
